Q.1: E-waste Data of India vs Nation's

Comparative Data Overview
(2015-2019)

Country	2019 E-waste Volume	E-waste CAGR	Population CAGR	Formal Collection & Recycling Rate
India	3.23 Mt (3230 Kt)	10.4%	0.8%	~1.3%-5%
United State	6.92 Mt	1.2%	0.5%	~15.2%
China	10.13 Mt	4.7%	0.4%	~16.1%
Germany	1.61 Mt	0.0%	0.4%	~51.9%
UK	1.60 Mt	1.5%	0.5%	~56.6%
Japan	2.57 Mt	0.3%	0.2%	~22.3%

Key Reflection:

Unprecedented Growth Velocity: India exibit's the highest annual e-waste growth rate (10.4%) among all evaluated nation's. India's e-waste volume expanded 2298% bet 2005 - 2019.

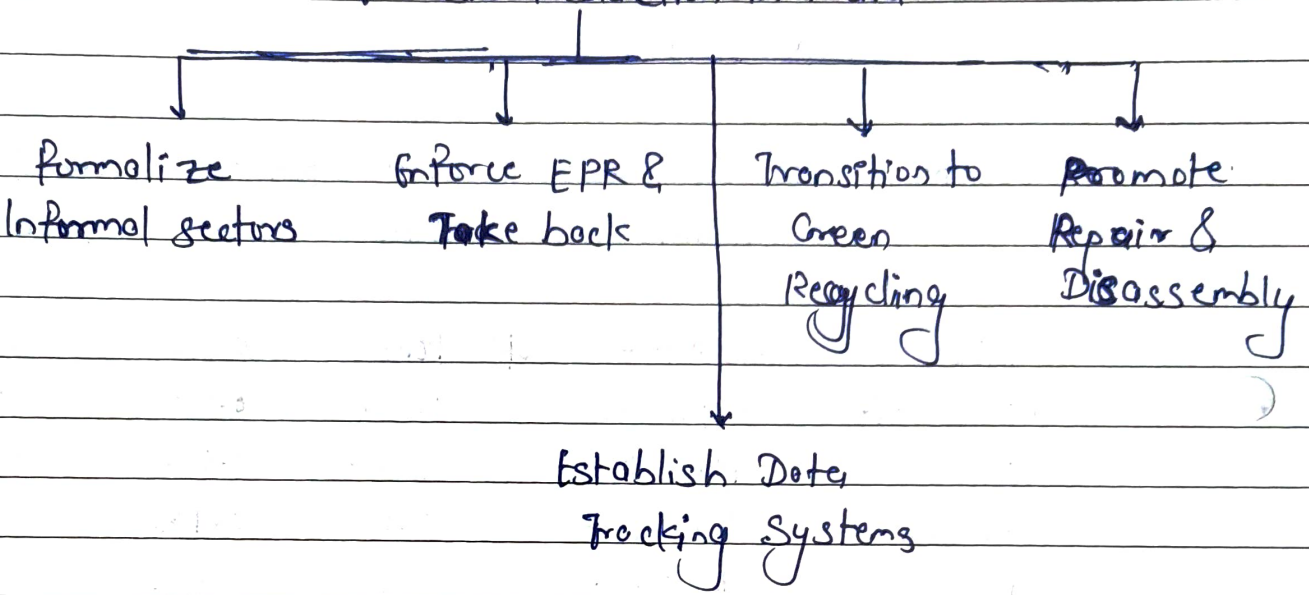

Severe formal Recycling Deficit: India collects/Recycle's only ~1.3% to 5% of it's e-waste In Contrast UK & Germany recycles over half of there e-waste.

Policy vs Enforcement Gap: India introduced regulations in 2011 (amended in 2015) but struggles with effective nationwide implementation's dislike nations like UK & Germany.

DATE:

Q.2: Step's that can help India to Solve this problem :-

formalize & Integrate the Informal Waste Sector

Provide Workers with personal protective equipment (PPE), basic mechanical dismantling tools, & training.

Strictly Enforce Extended Producer Responsibility (EPR) & Take Back frameworks :-

Hold the EEE manufacturers financially & logistically accountable for end-of-life product Management.

Implement Green & Sustainable methods like Using biometallurgical methods or less toxic hydrometallurgic solvents.

Implement low-cost nano-adsorbent's to capture mercury & gaseous pollutants.
